From: Saran Raj, Chief Executive Officer, Bayoftech Pvt. Ltd.

RE: Endorsement of Mr. Rakesh Thoppaen's Expertise in AI and Industry 4.0 Technologies.

To Whom It May Concern:

I hope you are doing well. My name is Saran Raj, and I am currently the CEO of Bayoftech Pvt Ltd. I have over 14 years of experience in digital transformation, focusing on the manufacturing industry. I specialize in leading projects related to Industry 4.0. This includes systems for managing manufacturing processes, tracking production, and integrating internet-connected devices in factories. I have a postgraduate diploma in Embedded Systems from DOEACC and a Bachelor's degree in Information Technology from Anna University. These qualifications, along with my success in advancing technology, I believe, make me well-suited to evaluate and discuss the professional skills and strengths of Mr. Rakesh Thoppaen.

As the CEO of Bayoftech Pvt Ltd, I enjoyed working with Mr. Thoppaen. He played an important role in securing the EDII Innovation Voucher A for our new AI-based surveillance prototype, which we launched at Aero India 2023 under the sponsorship of iDEX (Innovation for Defence Excellence). His advice was very important in developing this prototype and adding advanced AI features to our current Industry 4.0 solutions. Mr. Thoppaen's knowledge and

creative thinking have greatly improved our technology and how efficiently we operate.

Bayoftech Pvt Ltd is on a mission to transform Industry 4.0 with our series of cutting-edge products powered by Artificial Intelligence, and embracing data driven approaches. The project aimed to incorporate AI algorithms to existing Bayoftech's products thereby making the equipment prognostic in the sense of predictive maintenance through data analytics. This was expected to disrupt the traditional manufacturing process by simply learning the power of data coming out of Bayoftech's IoT products, reducing equipment down time and improving operational efficiency.

Mr. Thoppaen led efforts to integrate AI capabilities into Bayoftech's Industry 4.0 solutions and played a critical role in devising the data-driven strategies necessary for the development of predictive maintenance capabilities. His deep understanding of AI technologies and ability to innovate allowed us to realize the full potential of our IoT products, and dramatically improved the functionality and efficiency of our product line. Rakesh assumed the role of an independent advisor, spearheading an initiative to enhance our existing line of products, including Factory-BoT (a Manufacturing Execution System solution aiding Industry 4.0 practices) and an IoT solution facilitating real-time data capture from factory equipment. Leveraging his expertise in Artificial Intelligence, Rakesh led the team in implementing data-driven methodologies, integrating machine learning techniques to transition from preventive to predictive maintenance, and incorporating computer vision technology to streamline quality control processes. These initiatives resulted in heightened visibility and control, increased operational efficiency and productivity, enhanced quality management, optimized inventory management, and improved

responsiveness for our customers. As a consequence, our products witnessed a surge in sales and popularity, attracting a broader customer base due to the innovative strategies implemented under Rakesh's guidance.

The incorporation of AI capabilities into our product line not only transformed Bayoftech Pvt Ltd — predictive maintenance capabilities significantly reduced unplanned downtime and improved equipment reliability on the shop floor, enhanced not only our product offerings, but also our customer's productivity and profitability. The project has distinguished Bayoftech as a pioneer and set new standards for technological innovation and operational excellence within the industry. The realization of AI-driven predictive maintenance in our products thus represents a major step forward — not only for Bayoftech Pvt Ltd, but for the entire manufacturing sector. By this innovation, artificial intelligence has been brought into the realm of Industry 4.0 solutions, setting an example for other companies to follow that will lead to the establishment within the industry of more sustainable, efficient, and ultimately cost-effective operations. The manufacturing world is en route to a new era of digital transformation and operational optimization.

I strongly believe Mr. Thoppaen is an asset to the United States from his substantial experience working with me to integrate artificial intelligence capabilities into Bayoftech Pvt Ltd's suite of Industry 4.0 products. His unique problem-solving ability has resulted in implementation of AI-based data-driven predictive maintenance solutions revolutionized our product line and set the standard for operational technology in manufacturing. Mr. Thoppaen's ability to utilize AI as an enabler of productivity and profitability speaks volumes of his capability to offer new, creative

ways to resolve multi-layered problems. His value to advancing our technological capabilities is clear evidence of the potential for him to offer these abilities to any technological landscape. I strongly believe Mr. Thoppaen's technical know-how and inventiveness will be invaluable to the United States and move U.S. technology and industrial innovation forward significantly.

With that said, I strongly recommend Mr. Rakesh Thoppaen as an ideal beneficiary for the National Interest Waiver in the United States. Throughout our work together at Bayoftech Pvt Ltd, he showed an incredibly unique set of skills. His work has pushed our company's offerings to the next level and has completely redefined what excellence and innovation look like in the manufacturing industry overall. His combination of technical expertise and creative problem-solving are exactly the kinds of qualities that will add to the continued technological and industrial advancements of the United States. I am extremely confident that his work and his ideas in general will lead to new groundbreaking advances in technology that will benefit the global community at large — not just any single company or an industry. Please feel free to reach out to me should you require any other information.

Sincerely,

Saran Raj
