Dear Rakesh Thoppaen Suresh Babu,

Please accept this letter as an expression of our sincere appreciation for your service as a volunteer judge at the 77th Georgia Science & Engineering Fair (GSEF). The University of Georgia has a proud history of serving our state and nation through its teaching, research and public service programs, such as GSEF. The success of each year's program is due largely to individuals like you, who volunteer time, expertise and enthusiasm as judges.

Over the years, this program has been one of the best student motivators to build interest in and excitement for the study of the sciences, technology, engineering, and mathematics. We believe it is absolutely essential for the world's future well-being that we maintain a strong scientific career orientation among our young people. The Georgia Science & Engineering Fair promotes this concept and encourages the youth of today to make responsible advancements toward discoveries for tomorrow's needs.

Plans are already underway for the 78th Georgia Science & Engineering Fair, which is scheduled to take place March 26-28, 2026. Please mark your calendar! We value experienced judges like you, who volunteer your time and expertise each year to help Georgia's young scientists and engineers earn recognition for their successes.

We are pleased that you recognize the importance of stimulating and encouraging these young minds and imaginations. Again, thank you for your support.

Sincerely,

Dr. Joseph Hughes, GSEF Judge Chair
Laura Brewer, GSEF Director
